# EXPLOSION IN GINZA DUE TO UNKNOWN CAUSE

Explosion in Ginza due to unknown cause. At least 30 injured. Police are investigating the cause of the explosion.

The explosion occurred in the heart of Ginza, one of the most fashionable districts in Tokyo. The cause of the explosion is still unknown, but it is believed to have been caused by a gas leak. The explosion was heard from several miles away and caused a large fire to break out. The fire was quickly extinguished, but the damage to the buildings was severe. The explosion occurred on a busy street, and many people were injured. The police are currently investigating the cause of the explosion and have asked the public to provide any information they may have.

**DREDFUL  
SERIAL  
BOMBING  
INCIDENT  
OVER 30  
INJURED**

SO THEY STILL CAN'T FIND ANY CLUES ABOUT THE CRIMINAL

The third incident this month. Is it the work of the same criminal? The police are investigating the cause of the explosion and have asked the public to provide any information they may have. The explosion occurred in the heart of Ginza, one of the most fashionable districts in Tokyo. The cause of the explosion is still unknown, but it is believed to have been caused by a gas leak. The explosion was heard from several miles away and caused a large fire to break out. The fire was quickly extinguished, but the damage to the buildings was severe. The explosion occurred on a busy street, and many people were injured. The police are currently investigating the cause of the explosion and have asked the public to provide any information they may have.

JAPAN SURE HAS BECOME DANGEROUS WHILE I WAS AWAY FROM HOME FOR A LITTLE WHILE.

WOOSH

Sgt. Metropolitan Police Department

警視庁

THE SCIENTIFIC  
SPECIE INVESTI-  
GATIONS DIVISION  
IS STILL A YOUNG  
DEPARTMENT  
THAT HAS JUST  
RECENTLY ESTAB-  
LISHED LAST  
YEAR.

KYO  
HOSHINA  
AGE 13

IT'S A DETACH-  
MENT WITH MANY  
VERY TALENTED  
MEMBERS  
WHO STAND OUT  
EVEN AT POLICE  
HEADQUARTERS.

IT'S A GROUP  
OF DETECTIVES  
POSSESSING  
SCIENTIFIC  
KNOWLEDGE THAT  
SPECIALIZES IN  
INVESTIGATING  
CRIMES THAT INVOLVE  
THE LATEST IN  
SCIENTIFIC  
TECHNOLOGY.

AND SO,  
I WANT YOU  
TO AID IN  
THE INVESTI-  
GATION JUST  
THIS ONCE.

BUT EVEN  
THEY ARE HAVING  
TROUBLE  
FIGURING OUT  
THIS LATEST  
SERIES OF  
BOMBING  
INCIDENTS

I'M SORRY  
TO HAVE TO DO  
THIS TO YOU SO  
SOON AFTER YOU  
JUST GOT BACK  
TO THE COUNTRY,  
BUT PLEASE  
LOOK INTO IT.  
KOTO.

JUST LET  
SOMEBODY  
ELSE  
HANDLE  
THAT.

HEY...  
HOLD ON.  
I HAVE  
TO MONI-  
TOR THE  
PHONE!

OH?

ALL RIGHT.  
LET'S HEAD  
TO THE  
SCENE OF  
THE CRIME  
IMMEDIATELY.

YOU'RE  
AN ADULT,  
SO PLEASE  
WORK  
HARDER AT  
YOUR JOB.

BESIDES THAT,  
A CERTAIN  
SOMEBODY  
TOLD  
ME TO WORK  
TOGETHER  
WITH YOU.

I'M NOT A POLICE  
OFFICER, AND  
BESIDES, I'M  
JUST A KID, SO  
YOU HAVE TO  
COME WITH ME  
OR I WON'T BE  
ALLOWED TO  
ENTER THE  
CRIME SCENE.

SUPERINTEN-  
DENT GENERAL,  
ARE YOU  
SERIOUSLY  
STILL BE CRAZY  
ADDING YOUR  
GRANDCHILD  
TO THE INVESTI-  
GATION...

ANYWAY,  
DID I  
MENTION  
I'M A KID?

THE AIR IS 20% OXYGEN TO BEGIN WITH, SO AS LONG AS ONE COULD PREPARE A LARGE AMOUNT OF HYDROGEN, IT WOULD BE EASY TO CREATE AN EXPLOSION.

THAT'S THE PRINCIPLE BEHIND THESE EXPLOSIONS.

BY MIXING HYDROGEN AND OXYGEN, ONE COULD CREATE THE SOUND OF AN EXPLOSION AND RELEASE A LARGE AMOUNT OF HEAT DURING THE REACTION. AFTER THAT, THERE WOULD BE NOTHING.

IN SPITE OF THE EXPLOSION'S WIDE RADIUS, THE ENERGY WAS SMALL, AND THAT'S LIKELY BECAUSE THE HYDROGEN SPREAD AROUND, AND THE DENSITY THINNED OUT.

THE REASON THE DAMAGE TO PARTS OF THE CEILING IS SO MINOR IS THAT A LOT OF HYDROGEN, WHICH IS LIGHTER THAN AIR, BUILT UP AT THE CEILING.

WE CAN'T FIND EVEN A SINGLE FRAGMENT OF A COMPRESSED HYDROGEN GAS CYLINDER AT THE CRIME SCENE.

IF THEY HAD TRIED TO USE HYDROGEN FOR AN EXPLOSION OF THIS MAGNITUDE, THEY WOULD HAVE HAD TO USE A WHOLE TRUCKLOAD OF COMPRESSED HYDROGEN GAS CYLINDERS AND, EVEN THEN, IT STILL WOULDN'T HAVE BEEN ENOUGH.

HAHAH, SOME DETECTIVE WORK, BUT THAT'S ABOUT ALL I EXPECTED FROM A BRAT AFTER ALL.

WELL, ANYWAY, I'VE GOT A GOOD HUNCH.

ALL THAT'S LEFT TO DO IS FIGURE OUT THE METHOD.

WE EVACUATED  
ALL THE DEPART-  
MENT STORE  
STAFF AND CUS-  
TOMERS...

THE EX-  
PLOSION IS  
PLANNED  
TO GO OFF  
IN 30 MIN-  
UTES.

NO BOMB  
MATERIAL OF  
ANY SORT  
HAS BEEN  
DISCOVERED  
YET.

YEAH...  
MANY JAPANESE  
HAVE  
A LOT OF  
FREE TIME  
ON THEIR  
HANDS.

THE  
NUMBER OF  
CURIOUS  
ONLOOKERS  
AND MEDIA  
PEOPLE IS  
INCREDIBLE.

IT'S DANGER-  
OUS.  
PLEASE  
STEP  
BACK.

WHAT'S SO  
SPECIAL  
ABOUT IT THIS  
TIME THAT  
THEY FELT  
COMPELLED  
TO MAKE AN  
ANNOUNCE-  
MENT?

UNTIL NOW,  
ALL OF THE  
EXPLOSIONS  
OCCURRED  
WITH NO  
ADVANCE  
NOTICE.

BUT  
STILL,  
IT'S  
STRANGE...

WELL...  
THIS IS THE  
INCIDENT THAT  
SOCIETY'S  
CONCERN IS  
MOST FOCUSED  
ON RIGHT NOW,  
SO IT CAN'T BE  
HELPED.
